

How to check for a fit on the Side Mount 3-Step System

*Important note before reading; This step mounts to the winch post of your trailer. It will only fit 3" x 3" posts. If your winch post is any other size besides a 3" x 3", these steps **WILL NOT** work.

1. First, let's make sure you have enough room on the winch post to mount. The size of the mounting bracket is 4-3/4" x 2-13/16".
2. Next, we will check to make sure there is enough offset to clear your bow. The best way to measure this is by hanging a plumb bob off the side of the boat, parallel to the winch post. Measure from the plumb to the winch post. You need at most 17". Any distance greater than that means the steps will end up underneath the boat.
3. Please also review your trailer to be sure you can move any spare tires or trailer jacks that may interfere with the steps.
4. Attach at the bottom of this page is a diagram for you to review.

*If you have any questions, you can fill out the pre order form on our website and we will make a recommendation for you!
